Introduction

The Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey, developed by the Centers for Medicaid and Medicare Services (CMS) and the Agency for Healthcare Research and Quality (AHRQ), a division of the Department of Health and Human Services, is a standardized 32-question, inpatient experience survey tool and data collection methodology that has the capacity to elevate the quality and safety of health care services across America and transform the way hospitals do business. The three primary objectives for administering this standardized inpatient experience survey instrument include:

- Enabling objective and meaningful comparisons between hospitals for public reporting
- Increasing hospital accountability and incentives for quality improvement
- Enhancing public accountability through increased transparency

The Adult HCAHPS survey and data collection process is administered to discharged hospital patients over 18 years of age that have received medical, surgical or obstetric care and have spent at least one overnight stay in the hospital. Approximately 80% of all inpatients qualify to receive this survey. For a complete listing of patient qualifications, reference [the HCAHPS website](#).

Inpatient Prospective Payment System (IPPS) hospitals are required to administer the HCAHPS survey and publicly report the findings in order to receive a full annual payment update from CMS. Although HCAHPS data are not currently a requirement for critical access hospitals (CAHs) in order to receive full payment from CMS, HCAHPS data are part of the patient engagement domain of the Medicare Beneficiary Quality Improvement Project (MBQIP). All CAHs wishing to receive support through their state Flex Program [must participate in MBQIP](#). Furthermore, participating in HCAHPS can assist CAHs in preparing to link reimbursement to quality performance. Pediatric, psychiatric and specialty hospitals are excluded from participating in the HCAHPS process.

Hospitals participating in HCAHPS can self-administer the survey process if [strict criteria](#) is met, or they can select a trained, certified vendor to administer HCAHPS. In order to meet the HCAHPS guidelines monitored by CMS, hospitals or the vendors with which they contract must adhere to a standardized data collection process. This process includes:

- Obtaining a randomized survey sample of discharged inpatients
- Administering a standardized survey instrument on patient satisfaction of services and care via mail, telephone, Interactive Voice Recognition (IVR) or a combination of modes
- Adhering to guidelines for data coding and response rate calculations
- Systematically analyzing, preparing and submitting data, including implementing quality check activities
- Reporting hospital results publicly

Survey questions address the following topics:

- Communication with nurses
- Communication with doctors
- Responsiveness of hospital staff
- Pain management
- Communication about medicines
- Discharge information
- Transition of care
- Cleanliness of hospital environment
- Quietness of hospital environment
- Overall hospital rating
- Recommend the hospital

Questions are focused on obtaining the patient’s perception of quality. Research suggests that patient perceptions of quality influence their choice of health plans and providers, patient complaints and malpractice claims, adherence to medical advice and overall health status outcomes.

To ensure fair and accurate comparisons across hospitals, a CMS and HCAHPS Project Team apply adjustments to eliminate any advantage or disadvantage in scores beyond a hospital’s control, such as the survey mode. CMS publishes HCAHPS results quarterly on [the Hospital Compare website](#). Each question has a top box, or most desired answer option(s); only these responses are reported publicly.

If hospitals take the time to invest in completing HCAHPS, they are more likely to ensure they are meeting their mission, protecting their bottom line, enhancing their reputation and, foremost, improving patient care as a result of their increased dedication to implementing safe, quality improvement initiatives based on results of the HCAHPS data.

HCAHPS plays a large role in reimbursement as a result of the Patient Protection and Affordable Care Act (PPACA), which established a [Value-Based Purchasing \(VBP\) Program](#). VBP translates into a pay-for-performance reimbursement strategy based, in part, on performance for specified measures that are part of the Hospital Inpatient Quality Reporting Program (IQR) as monitored through CMS for those hospitals under IPPS. This movement to tie reimbursement to performance on quality metrics, including patient experience, means hospitals are held accountable for providing excellence in safe, quality patient care.

HCAHPS participation as a requirement in MBQIP by CAHs was previously mentioned. MBQIP, designed by the Health Resources and Services Administration (HRSA), Federal Office of Rural Health Policy (FORHP), is a voluntary program created to improve overall health care outcomes and enhance safe, quality patient care. A portion of this project is dedicated to encouraging CAH participation with the HCAHPS process and subsequent development of quality improvement initiatives. MBQIP provides CAHs with a rural-relevant, national benchmarking system to compare HCAHPS scores, develop tools, highlight resources and identify best practices for improving health care outcomes. CAHs who wish to receive any state Flex Program support must participate in MBQIP.

Vendor Directory Overview

Once a CAH understands the value and importance of investing in HCAHPS, the next step is to evaluate and understand the scope and breadth of services available. While self-administration of HCAHPS is allowable, stringent survey requirements must be met. If participating in the HCAHPS survey process does not appear feasible for a CAH to undertake independently, engaging a certified HCAHPS vendor is possible. Vendors included on the CMS HCAHPS approved vendor list are contacted by TASC twice annually and offered the opportunity to complete a profile form to be submitted into this directory.

Each vendor profile includes the following information:

- Contact information
- Location of services offered
- Experience in working with small rural hospitals
- Survey mode (mailed, telephone, interactive voice recognition, combination)
- Services provided
- Cost structure and price
- Frequency of reporting to CMS
- Frequency of reporting to the client and any additional information cited by the vendor

This directory has made every attempt to present the vendors' information in a neutral, unbiased manner. Inclusion in this directory is voluntary on the part of the vendor, therefore this is not an exhaustive list of certified HCAHPS vendors. A complete list is available on the [HCAHPS website](#). In the case of any discrepancies, the approved vendor list should be referred to as it may be updated more frequently than this directory.

Of the 17 featured HCAHPS vendors in this directory, all indicated offering services nationally with some listing experience in working with small rural hospitals and many vendors specifically noting their exclusive specialization with this population.

Vendors were requested to identify general service offerings, such as benchmarking data, competitor comparison reports, customized survey questions or group/networking pricing included in a basic HCAHPS package. There was great variety in these service offerings, which is available in the Services Checklist of each vendor page.

There was great variety in the cost structure and price and the majority of vendors chose not to relay their prices and encouraged hospitals to contact them directly, whereas others outlined detailed cost structures and service packages.

Please contact vendors directly for an exact quote for services as prices may vary and are subject to change.

The frequency for which an HCAHPS vendor reports results of the HCAHPS assessment findings to CMS is quarterly for the majority of vendors, with some providing survey results daily, weekly or monthly.

The frequency of vendors reporting HCAHPS data back to the client also varies, ranging from immediate receipt to quarterly. The mode of survey administration appears to be a factor contributing to the turnaround time of client feedback, with phone and IVR modes providing a more timely result.

Additional information was also collected from each vendor regarding their unique perspective on administering HCAHPS surveys, which readers are encouraged to review.

Cost Structure and Price

Arbor Associates, Inc. does not charge for setup or online access; one fee covers everything. Cost is based on the hospital size, starting as low as \$995 per year. Contact for specific pricing.

Frequency of Reporting to CMS

Quarterly

Frequency of Reporting to Client

Arbor Associates, Inc. offers weekly, bi-weekly or monthly reporting online for near real-time access to survey results and patient comments. We recommend open-ended follow-up questions presented to patients during phone surveys. Our reporting portal, ArborOnLine, allows hospitals to access their own results and easily carry out any cross-references needed. It will also show benchmark top-performers (best practices) information for all HCAHPS composite questions.

Additional Information

For over 35 years, Arbor Associates has pursued its mission of creating insight for hospitals across the country. Foremost is providing clients with accurate satisfaction statistical materials, plus verbatim comments at the level of HCAHPS, EDPEC, OAS CAHPS, CG-CAHPS, CAHPS Hospice, and HHCAHPS; comparing information to similar hospitals at the state and national levels. Services range from CMS-certified CAHPS surveys to online employee surveys to opinion research studies. Survey information is collected via personal telephone interviews with recent patients, a mode well recognized as best for a representative survey sample allowing for greater statistical accuracy with smaller sample sizes - which helps control costs.

Extensive patient comments clarify what patients truly appreciated about their care and how to improve their satisfaction. Arbor has an intense focus on customer service, offers on-site or online support to their clients, and makes their staff available for one-on-one training and decision making assistance.

Incorporate with client's existing patient satisfaction surveys	Yes	No
Multilingual survey options	No	-
Real time/near real time access to collected data	Yes	No
Staffed toll free hotline for patient's questions	Yes	No

Cost Structure and Price

CAMC Institute offers services yearly, with a renewable annual contract. Price structure varies depending upon the hospital's patient volume. There is no "flat"

fee. If you are a new client, the first year's price is based on a response rate of 40 percent. That can be adjusted if the client provides prior response rate information. All patients, unless a random sample is requested, will be in the monthly raw data file. Once a baseline price is set, historical changes in patient volume can be used to set future prices. Clients pay for all postage and other charges incurred in the process of completing the survey process.

Frequency of Reporting to CMS

Quarterly

Frequency of Reporting to Client

CAMC Institute sends a raw data report to the hospital monthly, unless otherwise requested. Urgent or high importance materials are sent out immediately in PDF or fax form. CAMC Institute works with clients to design a report that best meets their needs.

Additional Information

CAMC Institute is focused on providing basic, inexpensive HCAHPS services. CAMC Institute sends data to the hospital and prefers to steer away from adjusting data and making comparisons. Inaccuracies associated with small sample sizes, regional differences and so on are the reasons behind this decision.

Custom Survey Solutions, Inc.

Experience working with small rural hospitals

Custom Survey Solutions specializes in working with smaller CAHs. Currently 100% of our HCAHPS client base is small, rural hospitals.

Survey Modes Available

Mail

Services Available

Service Description	Available	Add'l Charge
Benchmarking Data	Yes	No
Client networking/sharing of best practices	No	-
Competitor comparison reports	No	-
Customized survey questions	Yes	No
Group/network pricing	Yes	No
Hospital employee training/education	No	-
Incorporate with client's existing patient satisfaction surveys	Yes	Yes
Multilingual survey options	Yes	No
Real time/near real time access to collected data	No	-
Staffed toll free hotline for patient's questions	Yes	No

Cost Structure and Price

Price is a flat \$3,200 yearly fee. This includes the first mailing and follow-up mailing for each patient. For smaller, rural hospitals we also offer the option of surveying all patients, including observation patients (not just those eligible for HCAHPS), so that we gather as much data and information as possible for your hospital. Your hospital report will include all of this data and analysis, but we will not report that information to CMS.

Optional questions that can be included on the existing form (approximately 4-5 questions) will be provided at no extra charge. If more questions are necessary, incorporating your existing patient satisfaction survey into the HCAHPS survey will require a small additional fee.

No contracts are necessary. There are no hidden fees.

Frequency of Reporting to CMS

Quarterly

Frequency of Reporting to Client

Quarterly, with lag time of about 30 days. We report out to the client as soon as possible, prior to uploading data to CMS. If more frequent reporting is required, we can accommodate those requests.

Additional Information

Custom Survey Solutions, Inc. is a full-service survey research firm located in Montana, where we truly understand the needs of rural health care facilities. Our mission statement embraces the idea that we provide numerous affordable survey options and produce reports that are easy to understand and user-friendly. Our products don't require additional consulting (with additional fees) to help you interpret your results. All mailings, administration and data entry etc. is completed in-house by trained, qualified personnel - nothing is ever sub-contracted. In addition to HCAHPS, we offer a wide variety of engagement and satisfaction surveys for the health care industry including: employee, physician, outpatient, long-term care, assisted living, ambulance, clinic, etc. We specialize in offering customized products and services to all of our clients.

National Research Corporation provides real-time, 24/7 access to data. Hospitals can continually track the outcome of research efforts as data comes in and is linked to the hospital’s individual Action Plan reports. These single-page reports inform hospitals of everything they need to know about their performance and provide clear, actionable information for process improvements.

Additional Information

For more than 30 years, National Research Corporation has been at the forefront of patient-centered care. Today, the company’s focus on empowering customer-centric healthcare across the continuum extends patient-centered care to incorporate families, communities, employees and other stakeholders.

In addition to a standard HCAHPS survey, other programs offered include solutions that measure patient, employee and physician experience, along with a CAHPS offering and a mobile point of care leader rounding app.

Other products include market-leading survey and reporting instruments that measure Patient & Family Experience; Long Term Care Resident & Family Experience (My InnerView by National Research); Employee Engagement; Physician Engagement; Home Health CAHPS; Clinician & Group CAHPS; Patient Outreach Programs (Connect by National Research); Market Insights; Online Physician Reputation Solution; Healthcare Analytics; and Home Health and Hospice Clinical & Outcomes Analytics (OCS HomeCare by National Research).

National Research also has a number of tools and resources available to help hospitals and healthcare organizations make sense of patient experience results and facilitate improvement. National Research offers several in-person regional

networking events across the country where participants are provided the opportunity to learn from peers and share best practices related to improving the patient experience in the hospital and clinic setting. Regularly scheduled webinars, including the Best Practice Webinar Series, are also offered on a variety of topics for hospital and healthcare organizations to learn how to effectively use their data, gain additional insight into their reporting results and hear client success stories. The annual Patient-Centered Care Symposium is one of their largest client events, where healthcare innovators convene to discuss the latest in patient-centered excellence.

Monthly structured reports, or daily if client would like "push" e-mail reports

Additional Information

Press Ganey Associates offers a number of CAH-specific services, including: customized survey questions available in 32 languages; a database of comparisons containing only CAHs (with the capability to compare question by question); small hospital specific newsletter and webinars; and a dedicated team of 20 CAH/small market sales and service teams that understand the challenges of the rural, community and critical access hospitals. Press Ganey Associates features networking opportunities and sharing of best practices among its members. There is an online forum for members to seek peer support and sharing of successes. Each hospital is assigned a personal improvement manager to help raise HCAHPS scores using evidence based best practices.

Frequency of Reporting to CMS

Quarterly

Frequency of Reporting to Client

Real Time data and reporting, including the ability to receive automated reports and goal tracking from the PRCEasyView.com® platform.

Additional Information

PRC has an experienced, dedicated CAHPS Team that has been helping clients and account teams meet the customer service needs of rural hospitals since 2004. We regularly share the latest developments in survey requirements, public reporting, and more. In addition, PRC offers educational resources and best practice documents to improve quality and service, including premium content materials exclusive to clients. All while collecting relevant, real time data to reflect the dynamic nature of healthcare.

To supplement CAHPS surveys that measure frequency of care, PRC can add questions that utilize a scale with “excellent” as the highest score, allowing organizations to understand the degree of satisfaction patients experience. In HCAHPS studies, PRC proudly achieves higher response rates than the national average, providing healthcare organizations with a more accurate gauge of their care. PRC Esurveys offer surveys on the go and PRC Star Ratings share real time data openly with consumers.

Cost Structure and Price

Research & Marketing Strategies, Inc. (RMS) offers multiple pricing options including per patient sampled and per completed survey. The price structure is customized based on the specific situations and needs of each hospital. There is a one-time fee for setting up the process and no monthly or annual base fees. Please call for a free consultation and price quote.

Frequency of Reporting to CMS

Quarterly

Frequency of Reporting to Client

RMS will provide a monthly file of all of the survey results, showing response frequencies. Each hospital will also have access to near real-time data through an interactive online portal, that includes benchmarking. RMS Healthcare offers an optional quarterly custom reporting option that includes more detailed analysis, as well as national benchmarking, graphical representation, a flat file, and year to date Top Box Table.

Additional Information

RMS is a full-service research firm with a dedicated healthcare division. The firm offers many consulting services in addition to HCAHPS including employee surveying, strategic planning, image and awareness surveys, brand/logo studies, community health needs assessments (CHNA's), practice transformation (for PCMH recognition), feasibility studies and more.

RMS Healthcare is a CMS-approved CAHPS vendor and has been conducting CAHPS surveys since the 2006, followed by HH-CAHPS, CG-CAHPS, ACO, OAS, EDPEC, and ICH CAHPS as they were implemented by CMS.

RMS maintains an on-site telephone center with highly experienced CAHPS interviewers. All calls are recorded for quality assurance. RMS works with each client to customize projects or programs to best fit the client's individual needs. RMS was named as a "top patient satisfaction surveying firm" in the country for 2019 by Modern Healthcare Magazine. RMS has also been recognized for their above national response rates.

Frequency of Reporting to CMS

Quarterly

Frequency of Reporting to Client

Reporting is done quarterly, which includes a separate report of 4 rolling quarter data, and if requested by the health agency, they do provide a monthly report. Comments from the surveys are provided monthly to each Hospital. Work is currently underway to provide results in a real-time/near real time environment.

Additional Information

Rural Comprehensive Care Network (RCCN) is a CMS-approved CAHPS vendor with over 10 years of experience in the administration of CAHPS surveys according to CMS standards. Other CAHPS survey RCCN is approved to administer are Home Health, Hospice, and OAS.

RCCN also administers surveys for Emergency Services, Outpatient Services, Swing Bed Patients, and a Clinic Survey to help meet all of our clients needs.

To keep up with the ever-changing needs of our clients, they are continually in the process of updating their reporting.

Location of Services Offered

National. All CAHPS related work is conducted from the Novi, Michigan office. Digital Surveys (non-CAHPS) are conducted from the Boise Idaho office.

Experience working with small rural hospitals

SurveyVitals has been providing surveying services to small rural hospitals and other healthcare providers since 2005. We have been conducting CAHPS related surveys since 2010.

Survey Modes Available

Mail

Services Available

Service Description	Available	Add'l Charge
Benchmarking Data	Yes	No
Client networking/sharing of best practices	Yes	No
Competitor comparison reports	Yes	No
Customized survey questions	Yes	Yes
Group/network pricing	Yes	No
Hospital employee training/education	Yes	No
Incorporate with client's existing patient satisfaction surveys	Yes	No
Multilingual survey options	Yes	No
Real time/near real time access to collected data	Yes	No
Staffed toll free hotline for patient's questions	Yes	No

Cost Structure and Price

SurveyVitals pricing depends on patient volume as well as services selected. Current CAHPS pricing ranges begin at \$2500. A standard supplemental question is provided at no additional cost that captures a patient's approval for sharing information at respondent level. All approved languages are provided at no additional cost.

Frequency of Reporting to CMS

Monthly and quarterly, dependent on how clients provide their data to SurveyVitals. We customize our CAHPS program around our individual clients systems and procedures.

Frequency of Reporting to Client

SurveyVitals provides a monthly report based on core questions and respondent level data (following CMS protocol) and includes benchmark data for comparison. Monthly data includes near real time "alerts" on low score data. "White mail" comments are also recorded and shared based on CMS protocol in the monthly report. A quarterly "snapshot report" is provided to our clients that includes trending data snapshot score. Finally, an annual summary report is provided at completion of year.

Additional Information

All CAHPS customers are assigned a dedicated Account Manager. These account managers work with their CAHPS clients to facilitate data feeds. They also work with clients on "alerts", improvement initiatives, "poster presentations" response rates and improvement best practices. SurveyVitals measures the success of our CAHPS program not only in compliance, but by providing easy-to-understand actionable results that drive client improvement.
